

PUT YOUR MIND AT REST...

Colorectal Cancer

Over 130,000 men and women will be diagnosed with colorectal cancer this year.

If you are 50 or older, have a family history of colon cancer, polyps or other risk factors, get screened regularly for colorectal cancer. Screening tests, like colonoscopies, can save lives by detecting colorectal cancer early and by finding polyps, which can become cancerous.

The Endoscopy Suite at Mount Sinai Hospital of Queens offers a full range of colorectal cancer screening tests in ultimate comfort at our beautiful, state-of-the-art facility. For more information or to schedule an appointment with a board-certified gastroenterologist, please call 932-0007.
