

# DO YOU HAVE WOUNDS THAT WON'T HEAL?

## THE WOUND CARE CENTER AT THE NEW PARKWAY HOSPITAL HAS GOOD NEWS FOR YOU...

There is hope beyond the traditional wound care therapy you may have experienced in the past.

Pictured above, one of our new Hyperbaric chambers, that use pressure and 100% oxygen, to significantly reduce the time it takes to heal stubborn wounds and ulcers that are the result of:

- Diabetes
- Radiation injury
- Infection
- Suppressed Immune Systems
- Unrelieved pressure
- Vascular Disease
- Malnutrition

Our multi-disciplinary team, of specially trained healthcare professionals, will work with you and your doctor to develop an effective and personalized approach towards the goal of promoting rapid healing and a better quality-of-life for you.
