

# FINALLY...

## A Solution For Frustrating, Ill-Fitting, Irritating Dentures

**Hint:** It doesn't have anything to do with more adhesives

**Queens, NY:** In your town, a new FREE report has recently been released by Dr. Clifford Degel that reveals the best kept secret for ending the frustration of ill fitting, rubbing, or frustrating Dentures.

Whether you wear partials or full dentures, you will want to know why over 1,000,000 people are now raving about their new ability to eat the foods they love. Smile with confidence...and enjoy having functional teeth that are **80% stronger and reliable than dentures!**

This report will allow you to get the 'behind the scenes' story about this treatment that was released in 1982, but still is not well understood in the U.S.

**For your FREE copy, call toll-free, 24 hour recorded Message Hotline:  
1-888-624-2101 or go to: [www.smiledr.com](http://www.smiledr.com)**

### CONFIDENTIAL REPORT:

***7 Reasons Why People Become Irritated And Frustrated With Their Ill-Fitting, Rubbing, Unattractive Dentures!:***

1. *Dentures coming loose as you laugh, cough or sneeze.* Have the confidence and security of teeth that stay in.
2. *A thick layer of nasty tasting denture adhesives interfering with your enjoyment of food.* No need for that, your teeth are firmly attached without the need for those sticky pastes.
3. *Wrinkles from loss of bone and tissue to support the delicate muscles of the face.* Your youthful appearance will return because you will replace what Mother Nature has taken away...and be prepared for the questions asking if you had plastic surgery.
4. *Eat the foods you love again.* There is nothing worse than having to watch what you order at restaurants for fear that you won't be able to chew it in front of your friends and loved ones. Your menu options will open up as you explore foods again that you had to abandon because you weren't able to chew.
5. *Sores from loose fitting dentures rubbing your gums.* No more pain.
6. *Covering your face with your hands for fear of embarrassing situations.* You will find yourself looking in the mirror more because you weren't hiding anymore. Friends and loved ones are going to comment how happy you seem now. You might even fall in love all over again.

7. **Look Younger.** Give you back the 10 years of life that was taken from you when you lost your teeth.

Now, here's a startling statistic that makes me ask the question:

***“Why Aren't Seniors Being Told These Facts About How Their Dentures Or Missing Teeth Are Affecting Their Health?”***

Respected research from the world renowned Mayo Clinic found that people who are missing teeth are likely to die 10

years earlier than their peers with all their teeth. Your health and your chance at happiness have been reduced by 14%.

That's loss of time with loved ones, travel plans never taken, and enjoying your well deserved retirement.

It's quality time to do what YOU WANT TO DO...  
stolen from you.
